

Boiled Egg Cutter

- Affordances
 - Metal strings affords cutting.
 - Dented part of plastic affords sitting.
 - Metal holder affords lifting.
- Signifiers
 - Metal and plastic joint signifies that it can be lifted.
 - By lifting the metal, and putting soft things in and closing the gap, it signifies that metal strings can cut through the soft object. (egg cutter)
- Feedback
 - It may be hard to know at first if the lifter needs to be lifted up or pushed down with a boiled egg. (Lift up first mark could be useful!)

Measuring Cup

- Affordance
 - The bowl affords holding stuff.
 - It stands by itself.

- It affords to hold either liquid, powder or solid stuff inside.
- Signifiers
 - It's bottom side, it says "1/2cup" telling it is measuring cup.
- Feedback
 - It doesn't have any guideline on how much powder or liquid that it is supposed to hold especially with the ear part. Maybe dash line or indicating line inside the measuring up would be useful.

Can Opener

- Affordance
 - Handle affords crushing or squeezing.
 - Twister affords some wheel function.
 - The other side of this object has sharp wheel which affords cutting function.
- Signifiers
 - Long stick part signifies that those are handles.
 - Twister signifies that it needs to be twisted to function.
- Feedback
 - Indication of which direction to twist can be useful.
